

INNOVATIVE

formulations developed to lead the **commercial** market in **chemical water treatment**

High performance

product range to restore and optimise system efficiency

Maximises longevity

for large volume commercial heating and cooling installations

Protects against the risk of system breakdown and component failure

Compatible with metals and materials commonly used in heating and cooling systems

Proven product efficacy – developed to exceed standard environmental and sustainability requirements

FERNOX
MAKES WATER WORK

FC3 Cleaner

Universal, powerful chemical cleaner – nitrate, EDTA and Phosphate free

- Pre-commission cleaner for new installations
- Removes sludge, scale and contaminants to restore the efficiency of existing systems
- Suitable for use when powerflushing
- No neutraliser required
- 20 litres, 1% dosage rate

Product code: 62224

FC1 Inhibitor

Market leading inhibitor – proven track record in system protection

- Maintains system efficiency and extends component longevity
- Prevents limescale build-up and corrosion formation
- Developed to work with steel, cast iron, copper, brass and aluminum
- Non-toxic, environmentally friendly formulation
- 20 litres, 1% dosage rate

Product code: 62223

FC1 Filter Fluid+ Inhibitor

Innovative inhibitor with a dispersant – designed to work with any system filter

- Detects, lifts and delivers system contaminants to a filter for safe removal
- Continuous protection against corrosion and scale formation
- Assists in system maintenance to reduce time on-site
- Mitigates the need for a system shutdown
- Perfect partner to the TF1 Delta Filter
- 20 litres, 1% dosage rate

Product code: 62225

Alphi-11 Antifreeze Protector

Effective combined antifreeze and inhibitor package – protects up to -22 °C

- Protects heating and chilled water systems
- Prevents frost damage and avoids the need for winter drain down
- Maintains efficiency levels and extends system life
- Prevents limescale build-up and corrosion in mixed metal systems
- Dose rate dependent on antifreeze levels required

Product code: 23980

TF1 DELTA FILTER

- Optimises system performance and protects against system breakdown
- High performance 2" BSP nickel-plated brass light commercial filter
- Triple action: magnetic, hydrocyclonic and air separation
- Fast and simple to install and maintain
- Makes servicing the system easier – minimum system downtime

Product codes: 62226 (with valves) 62228 (no valves)
