

TF1 DELTA FILTER

OPTIMISES SYSTEM PERFORMANCE & PROTECTS AGAINST SYSTEM BREAKDOWN

- ✓ **High performance**
2" BSP nickel-plated brass
light commercial filter
- ✓ **Triple action:**
magnetic, hydrocyclonic
and air separation
- ✓ **Fast and simple** to
install and maintain
- ✓ Makes servicing
the system easier –
**minimum system
downtime**

FERNOX
MAKES WATER WORK

Designed to cope with challenging systems

- Three methods of filtration
- Fits easily into horizontal or vertical pipework
- Can be positioned in four orientations
- Designed to be installed onto 2" pipework or fitted into larger pipework via a bypass
- Supplied with high quality valves and brackets

Flexible, effective and simple to install

- Ultimate system performance and protection
- Significantly impacts energy efficiency
- Fast & easy installation – minimum pipe alterations necessary with reduced system downtime
- Engineered to tackle the demands of complex systems
- Easy and fast cleaning – no need to disassemble the filter or remove it from the pipework

Maximum flexibility and adaptability for all system types

- Large volume heating and cooling systems
- New and existing installations – easy to retrofit
- Zoned or cascade systems, incorporating low loss header or plate-to-plate heat exchangers

Product code: 62226 (with valves) 62228 (no valves)

FC1 FILTER FLUID+ INHIBITOR

- The market-leading and proven Fernox F1 inhibitor formulation with an active dispersant
- Designed to be used with a system filter
- Detects, lifts and delivers system contaminants to a filter for safe removal
- Continuous protection against corrosion and scale formation
- Assists in system maintenance to reduce time on-site
- Mitigates the need for a system shutdown
- Perfect partner to the TF1 Delta Filter

Product code: 62225

TF1 DELTA FILTER THERMAL COVER

- Improves energy efficiency
- Promotes safer handling
- High quality, flame retardant protective cover

Product code: 62231
